

ST05 Candidate pool sensitivity

Candidate v0.1 • page 1 • 4 rows • not inserted in manuscript

Dataset	Swin input	Contexts	Selection changed	95% paired CI	Mean top-two ΔBA: four / five (pp)
ISIC2019	shared	15	0.400	[0.067, 0.733]	2.833 / 2.527
ISIC2019	swin_weight_eval	15	0.667	[0.400, 0.933]	2.833 / 2.726
MURA	shared	15	0.800	[0.533, 1.000]	0.986 / 1.088
MURA	swin_weight_eval	15	0.867	[0.600, 1.000]	0.986 / 1.084

Four-CNN versus five-model candidate pools at the same five splits and three seeds. Intervals are existing paired nested sensitivity intervals. Selected-identity changes reflect candidate-pool dependence.
