

ST10 Original mixed effects variance structure

Candidate v0.1 • page 1 • 4 rows • not inserted in manuscript

Stratum	Split variance share	Model×split share	Residual share	Model
OrganAMNIST / A	0.103	0.166	0.730	Reported nonsingular fallback
OrganAMNIST / B	0.128	0.248	0.625	Reported nonsingular fallback
SIPaKMeD / A	0.118	0.362	0.520	Reported nonsingular fallback
SIPaKMeD / B	0.159	0.341	0.500	Reported nonsingular fallback

Original four-stratum reported fallback: $BA \sim \text{model} + (1|\text{split}) + (1|\text{model:split})$. Variance shares describe these fitted models and are not causal attribution. This is a display of existing original outputs, not a new extension mixed-model fit.
