MURA / A	Swin-T / swin_weight_eval	RTX 4090 D	15	780.6 / 92.0	752.7

Reported wall-clock within each recorded hardware and timing scope. Original: run-entry through export; extension: after model/data-loader initialization through export/hashing. Different scopes and parallelism prevent direct hardware-speed comparison. Exact source scope is recorded in T46.
