

ST14 Original model parameter counts

Candidate v0.1 • page 1 • 8 rows • not inserted in manuscript

| Original dataset | Model           | Class count | Total parameters | Trainable parameters | Fine-tuning scope                                  |
|------------------|-----------------|-------------|------------------|----------------------|----------------------------------------------------|
| SIPaKMeD         | ResNet-18       | 5           | 11,179,077       | 8,396,293            | layer4 + fc                                        |
| OrganAMNIST      | ResNet-18       | 11          | 11,182,155       | 8,399,371            | layer4 + fc                                        |
| SIPaKMeD         | ResNet-50       | 5           | 23,518,277       | 14,974,981           | layer4 + fc                                        |
| OrganAMNIST      | ResNet-50       | 11          | 23,530,571       | 14,987,275           | layer4 + fc                                        |
| SIPaKMeD         | DenseNet-121    | 5           | 6,958,981        | 2,165,253            | features.denseblock4 + features.norm5 + classifier |
| OrganAMNIST      | DenseNet-121    | 11          | 6,965,131        | 2,171,403            | features.denseblock4 + features.norm5 + classifier |
| SIPaKMeD         | EfficientNet-B0 | 5           | 4,013,953        | 418,565              | features[-1] + classifier                          |
| OrganAMNIST      | EfficientNet-B0 | 11          | 4,021,639        | 426,251              | features[-1] + classifier                          |

Original-dataset classifier configurations only. Parameter counts are architectural records; neither analysis-host package versions nor unrecorded extension parameter counts are inferred from them.
